SKILLS

Languages:	C++, Java, Python, SQL
Libraries and Tools:	NumPy, Pandas, Matplotlib, Seaborn, TensorFlow
Data & Analytics Tools:	Excel, Power BI, VS Code, Spyder, Tableau
Analytical Competencies:	ETL, EDA, Data Cleaning, Statistical Analysis, Regression, KPI Creation, Dashboard
Soft Skills:	Problem-Solving, Collaboration, Adaptability, Leadership, Critical Thinking

PROJECTS

HueHaven – Java-Based Color Palette Application GitHub	Jun'25
- Designed a GUI-based application that empowers users to explore, generate, and organize color palettes with enhanced usability and smooth navigation. - Implemented Java Swing and AWT components with event-driven architecture, real-time color rendering, and HEX/RGB conversion using OOP-driven modular design. - Delivered a production-ready palette manager enabling persistent storage of custom themes, improving user productivity and design consistency. Tech Stack: Jawa Swing, AWT, OOPS.	
Zomato Restaurant Dataset Analysis GitHub	Apr'25
- Conducted an end-to-end analytical study on the Zomato restaurant dataset to identify cuisine popularity, pricing patterns, rating distributions, and service availability across major cities. - Applied Python (Pandas for preprocessing, Matplotlib/Seaborn for exploratory visualizations, correlation mapping, and comparative analysis) to extract patterns and relationships within the dataset. - Generated data-backed insights revealing the most preferred cuisines and key variables influencing higher restaurant ratings and customer satisfaction, supporting informed decision-making in food service analytics. Tech Stack: Python, Pandas, NumPy, Matplotlib, Seaborn.	
India City GDP Analysis Dashboard GitHub	Dec'24
- Developed an interactive Power BI dashboard to analyze India's GDP trends, city-wise contribution, and sectoral performance by integrating multiple real-world datasets using Power Query-based ETL processes - Designed a star schema data model and implemented advanced DAX measures (Total GDP, Growth Rate, City Contribution %) to enable efficient, dynamic, and multi-dimensional analysis - Created interactive visualizations (KPI cards, line charts, bar charts, and maps) with slicers and drill-down features to explore GDP trends, sectoral insights, and regional economic patterns - Derived actionable insights by analyzing GDP–employment relationships, sector dominance, and metro city contributions, highlighting post-COVID recovery trends and supporting data-driven decision-making Tech Stack: Power BI, Power Query, Excel, DAX, Data Modeling.	

TRAINING

Fundamentals of Data Structures: Learn, Apply and Build Projects Lovely Professional University	Jun'25-Jul'25
- Gained in-depth understanding of Core DSA concepts, including arrays, LinkedList, stacks, queues, trees and graphs. - Applied DSA knowledge in projects such like Tic Tac Toe, Smart Parking System, and other problem-solving applications such as Process Priority Optimization. - Built interactive projects such as a Calculator, Kids Learning App, and Login & Signup Page with SQL-based data integrity and validation. Tech Stack: Jawa, OOPs, Array List, Array Map, HashMap, Graphs, Trees.	

CERTIFICATES

Master Generative AI & Generative AI tools (ChatGPT & more) Udemy	Aug'25
ChatGPT-4 Prompt Engineering: ChatGPT, Generative AI & LLM Infosys	Aug'25
Build Generative AI Apps and Solutions with No-Code Tools Udemy	Aug'25
Software Development Processes and Methodologies Coursera	Apr'24

ACHIEVEMENTS

Top 10 Finalist – Hackathon at Lovely Professional University: Secured a position among the top 10 teams out of 120 in a university-level group hackathon, showcasing strong problem-solving, teamwork, and innovation skills. Winner – Digital Poster Making Competition: Won the 1st prize with a cash reward of ₹8,000 for designing a creative and impactful digital poster, demonstrating excellence in visual communication and design aesthetics.
